

DESCRIZIONE DESCRIPTION

COB Series LED strip lights are designed to produce a smooth, seamless line of light, with options to suit both wet and dry locations. Chip-on-board technology reduces heat build up for extended life and has a higher density of LEDs for a more intense, uniform light. The superior design shows no visible dots or hot spots—even without a diffuser—making it ideal for reflective surfaces such as granite countertops and tile floors. The protective silicone sleeve on IP68 rated models allows the strip to be installed in areas exposed to splashes or low pressure sprays of water. Improved flexibility of the COB design can also allow light to be wrapped along edges and curved surfaces.

GENERAL

IP68
IK08
Beam Angle: 120°
CCT Available: 3000k

ELETTRICO ELECTRICAL

10W/M
Working voltage: DC24V
PCB: 8mm
Dimension: 5000 x 8 mm
attrezzatura Compreso
gear included

ABBIGLIAMENTO ILLUMINAZIONE

ILLUMINATION APPAREL

IRC ≥ 90 CRI ≥ 90
Light Efficiency : 90 - 100lm/W
Chip Quantity /M: 320 pcs/m

REGOLAMENTO DIMMING

on / off
Phase Dimming
1-10V
DALI

MATERIALE MATERIAL

Flexible Strip Light
Nano Coated 3MM Sticker

Bends less than 30 mm will damage circuit traces and void warranty.

Bending strips at sharp angles will damage circuit traces and void warranty.

Twisting strips will damage circuit traces and void warranty.

Bending strips on horizontal plane will damage circuit traces and void warranty.
